

ePDU G3 Platform

Powering Business Worldwide

www.eaton.eu/ePDUG3

Eaton's 3rd generation power distribution technology

The ePDU G3 platform is designed to provide reliable, cost effective power distribution together with highly accurate monitoring and control for IT equipment in the datacentre.

This industry-leading platform enables you to:

- Reliably distribute power to your IT equipment
- Accurately monitor and manage power consumption
- Control, configure and update en-masse via management software

Operate in extreme environments

The ePDU G3 can be used in 60°C environments and containment solutions

Prevent accidental disconnect

- Integrated IEC outlet grip plug retention
- Prevents accidental disconnect from being bumped or from vibration
- Works on any IEC plug

Simplify load balancing

Colour coding and laser engraved chassis easily link breakers to outlet groups

True IEC Class 1 billing grade accuracy

Monitor your energy consumption (kWhr) plus V, W and A extremely accurately. Monitor ePDU and branch circuit

Reduce the IP ports needed to monitor your power

- Daisy-chain up to 4 ePDUs to reduce the cost of networking
- Reduces network infrastructure cost by 75%

Centrally monitor and manage

- Easily monitor the status of your power distribution
- Plus optional environmental monitoring

No downtime on updates

- Hot-swap eNMC and intelligent firmware
- En-masse configuration and en-masse firmware upgrades available or copy and paste configurations via USB

Intelligent Power Pod

Your Business Live 365

Eaton's ePDUs are part of Intelligent Power Pod,™ an integrated power management system for converged and hyper-converged infrastructure solutions.

The system incorporates power backup, power distribution, power management, housing and support services.

It includes full integration with hypervisors to automate the migration of virtualised equipment and provide the business continuity and resilience you need.

Your converged solution is protected, managed, intelligent and works non-stop.

www.eaton.eu/live365

Easily access hot swappable IT equipment

The ePDU doesn't protrude into the rack and is low profile even at the breakers
52 x 53mm chassis, and 58.7mm at breakers

Multiple mounting options

- Button mount with rear and side mounting options
- Raise or lower the ePDU in the rack to suit your installation
- Unique variable mounting system can be mounted at any point on the ePDU and gives full flexibility

ePDU G3 Technical Specification

Growing functionality

G3 Key technology features	G3 Metered Input	G3 In-Line Metered	G3 Basic
IEC outlet eGrip plug retention	√	N/A	√
±1% IEC class 1 billing grade accuracy	√	√	N/A
Colour-coded outlet and breaker sections	√	√	√
Hot-swap eNMC meter with advanced LCD	√	√	N/A
Low-profile form factor	√	√	√
High operating temperatures	√	√	√
Daisy-chain network	√	√	N/A
Multiple install options	√	√	√
EnergyWise ready	√	√	N/A

Low profile at breakers:

ePDU Dimensions: 52mm width, 53mm deep (58.7mm at breakers).
Technical drawings and pictures available on Eaton.com/ePDUG3.

Accessories

Environmental monitoring (Temperature and Humidity Probe) available separately. Part number EMP001.

Need Something Special?

- Dedicated engineering teams in 3 centres of excellence are available to create your perfect ePDU.
- Specific configurations or complete engineering projects.
- Including national socket types, UK, French, Din/Schuko – including combinations of up to 3 types of outlet on an ePDU.
